

# Quantum Board

The European High-Tech Scouting Club

Quantum Board is a European network of investors with focus on high-leverage seed investment opportunities addressing industrial high-tech markets.

Quantum Board is actively scouting in the world of material- and process-innovations for specific applications around energy, environment and automotive with strong industry demand.

Selected high-potential innovators will be invited to join Quantum Board as a member and represent an outstanding deal-flow.

## Focus

### TECHNOLOGIES

Material- and Surface Science

### INDUSTRIES & TOPICS

Photovoltaics & Solar / OLED- & Display-Materials / Fuel Cells & Hydrogen Storage / Battery Technology / Membranes & Nanofiltration

## Structure

Quantum Board represents a club-style circle of experienced business angels with strong industrial background, specialized VCs and strategic industrial investors. Innovators have member status as well. Membership is by invitation only. Dues are solely paid by the investors.

## Benefits

Quantum Board is actively screening outstanding innovators and investors and such represents a high calibre community and a knowledgeable network around our tech-topics.

Within these topics Quantum Board has highest segment penetration and offers critical mass for balanced investment decisions and consequently a high quality deal flow.

Video pitches, fact sheets and individual recommendations pave the way into the relevant member groups. Introductions to other members are always made personally by the club management. Quantum Board acts pragmatically, effective and saves valuable time.

Syndication becomes much easier amongst conversant and adept members who built up trust in a club-style environment. Quantum Board closes the gap between individual angel and VC investment volume.

Quantum Board organizes a number of events for its members: annual meetings including club-updates and room for socializing / peer workshops on specific investment- and high-tech-topics / group excursions to conferences, trade shows and institutes.
